Business Worries Caused Suicide.
 Bonaville, Man, June 6.—A man named McKinnon, aged about forty, and recently arrived from South Africa, suicided at the home of his brother-in-law, Sam Ross, at Bonaville.

Argyle, also miles from here on Saturday, by taking an overdose of laudanum. Business troubles are supposed to have been the cause. The coroner, Dr. McLeod, was called in and an inquest is probable.

A COLLEGE FOR THIS PROVINCE

Alberta Synod's Overture for Establishment of Theological College Before General Assembly

Halifax, N.S., June 6.—At the opening of the afternoon session it was decided that the assembly should adjourn at 4 o'clock and accept the invitation of the entertainment committee to join in a trip on Halifax harbor. As a result it was decided that the program for the evening meeting should be changed and that the entire night session should be given up to the discussion of the Queen's University case, in the hope that a settlement might be reached.

The question of the establishment of a theological college in Edmonton was introduced by an overture from the Synod of Alberta. The proposal is to erect a residence and hall in connection with the Provincial University and to begin the work of teaching in the fall of the present year. The question was referred to a select committee of which all the representatives from Alberta are members.

A letter from Premier G. H. Murray was read, replying to a communication from the assembly. Premier Murray is confined to his bed in the hospital seriously ill, and the letter received by the assembly was the first sent out by him in a long period.

Opposes Change in Queen's.
 Continuing the discussion of the Queen's question, R. Lee, of Peterborough, a graduate of Queen's, strongly opposed the proposed change. Referring to the argument that this change would enable the professors of Queen's to share in the benefit of the Carnegie pension fund, this fund had been greatly overestimated and that the cash value would not exceed \$100,000. There were also objectionable features in connection with the fund. The trustees of the fund interfered in the internal management of the college and certain American institutions, which were eligible to share in the fund, refused to do so for this reason. With reference to the argument that young men of other denominations refused to attend Queen's owing to the fact that it was a Presbyterian institution, Mr. Lee stated that there were large numbers of students who were sent to this university on the very ground that it was under the direction of a religious body. Roman Catholics had stated to him that while they would prefer to send their sons to a Roman Catholic college, they would accept them to Queen's, as a denominational college, than to send them to a national university.

Dr. Daniel Gordon, principal of the University, made an eloquent plea for separation, going over the ground fully. Reference was made by him to the contrast between national and denominational direction, and he argued that the church had been devoted to national education. Queen's College had been founded as a protest against the denominationalism of King's College, Toronto, and the late principal, Dr. Grant, had always looked forward to the time when the institution would be nationalized.

The allegations of the connection which exist between the university and the church were clearly pointed out. The church cannot prevent certain changes in the University, but it can insist on nothing. It cannot appoint a single professor, nor appoint a single trustee. An argument was based by the speaker on the fact that Dr. Douglas, of New York, had made an offer of \$50,000 for the endowment of a chair in Canadian history on the understanding that the connection of the college with the church should dissolve. This offer had been unanimously accepted by the trustees. If the church now refused to grant this request of the trustees, what was to be done?

Speaking generally, Dr. Gordon, stated that it filled him with alarm and the deepest concern when he began to consider what would happen if the assembly should actually refuse to grant this request. The responsibility for the University was wholly on the trustees and he could scarcely understand how they could go on with their work if the members of the assembly to this change was withheld.

GIGANTIC FOREST RESERVATION

14,000 Square Miles on Slope of Rockies Reserved From Settlement.

Ottawa, June 6.—The entire eastern slope of the Rocky Mountains, from the international boundary northward to a short distance north of the 54th parallel of latitude, is now reserved from settlement or occupation, and will be administered entirely with a view to the proper utilization and reproduction of forest, protection of the water supply of the prairie provinces, and related objects. Such is the effect of an order in council which has been passed.

The total area of the district now reserved from settlement, along the eastern slope of the Rockies in Canada, is about 14,000 square miles. Adjacent to the south is an area of 4,000 square miles, similarly reserved by the U.S. government and known as the National Park.

Of the area reserved in Canada, Rocky Mountain Park and Jasper Forest Park, with an area of 3,000 square miles, and Waterton Lakes Park, 34 square miles in extent, have been reserved for some time. The area now put under reserve for the first time is thus about 4,500 square miles (10,000 acres).

The entire area of 14,000 square miles comprises an area over two-thirds that of Nova Scotia. The most northerly boundary of the reserved land is situated between forty and fifty miles north of the latitude of Edmonton, and about one hundred miles northwest of the Yellowstone Pass. The western boundary of the reserve is the boundary between the provinces of Alberta and British Columbia (i.e., the crest of the Rockies) and the eastern boundary is an irregular line fixed by the order. The width of the strip, not wide varies from ten to thirty

miles from the international boundary up to the latitude of Calgary, and from there northward extends out to from thirty to fifty miles, continuing west to the northernmost boundary.

The lands included in the tract are for the most part elevated and rocky, and generally not suited for agriculture. They are, however, covered to a large extent by forest which is of great value for the supply of wood and lumber to the prairie country lying eastward from the base of the mountains; for the requirements of coal mines and the protection of the sources of the main streams of the central west. An additional 40,000 square miles just reserved.

The effect of the reservation will be to withdraw the lands from homestead entry or sale, and the timber for hunting and trapping it will be necessary to have a permit.

Pursuing the Mad Mullah.

Aden, June 6.—It is rumored here that the Mad Mullah, who for so long has disturbed the hinterland of Somaliland, is being pursued by eleven thousand "tribesmen."

Heart of St. Joseph Stolen.

Rome, June 6.—The relics of the heart of St. Joseph and a famous Monstrance, designed and executed by Giovanni Crollini, have been stolen from the Cathedral of Lodi.

Western Clays

LIMITED

PLACE ORDER FOR FIRST CLASS PLANT

The response, to the invitation to subscribe for the Preferred Shares in this Company has been sufficiently reassuring to the Directors to justify them in placing the order for their plant, and the Company's executive head, Mr. I. H. Hodson, has left for England.

The plant will be the most modern, most economical, and most effective that the skill of the most experienced manufacturers can devise. It will, it is expected, enable the firm to work winter as well as summer.

There are Only Five Such Clay Deposits on this Continent

Think what huge significance this bears. Only five clay deposits known from which vitrified sewer pipe can be made. And, of these, four are in the United States, the other side of one-third tariff wall, and one in Ontario with an immense haul to Western markets.

Edmonton has not yet seen so great an opening for the establishment of an immense industry safeguarded from competition in every way.

The value of the raw clay alone must be close to One Million dollars, with only \$150,000 capital against it.

The preference shares must rise almost immediately in value to \$400 or \$500 each and only \$50 each is to be called up so far as the directors can see.

TERMS:—\$10 on application, \$15 on allotment and \$25 at three months

SPORTING NEWS

BASEBALL

BRANDON WON AT THE HAT.
Medicine Hat, June 6.—The champions had a sign off in the field this evening and gave pitcher poor support, eight costly errors being made. For two on the bases contributed to the loss, two men being caught napping on the bases. The three-bagger scored three of the runs.

CALGARY BEAT MOOSE JAW.
Calgary, June 6.—The game tonight was taken from Behn Hoods by scores 9 to 6. Gehan pitched excellent ball for the locals and Brown for the visitors was also there with the goods. The feature of the game was the two home runs by Paddock. Moose Jaw held the lead up to seventh when Gehan came in and up to Gehan crowing the pan and in the eighth three more including a home run were scored by the locals. Paddock was handed 18 hits for his double header status and Gehan also got 18 for the last run.

MINERS BEAT MAROONS.
Lethbridge, June 6.—The Miners had an easy time with the Maroons tonight, winning 11 to 3. Leno was in form and kept him matted though more aggressive than usual with power. Winners hit home run from the start, getting five singles in third. Leno's run in here-handed catch of Dudley's sure tri-

the city last night from Seattle and will be in the game this afternoon. Grady will fill up the last week spot on the Maroons' side. Brennan will be back in the game to replace Bennett, the latter will retire to his customary position in the outfield.

Manager White yesterday received a wire from Spokane that owing to the crippled condition of the pitching staff of the team of that city the management did not see its way clear at the present time to release Bennett, the latter will be to join the ranks of the Edmonton team later on in the season. Bennett pitched against Seattle last week held the slugs of the Coast City down to four hits and was a game by two runs to one.

Olsen was to lead to Brandon, because of the four outfielders his batting average was the lowest. The latest figures show that Olsen leads the team in hitting. He has hit all pitchers alike while Olsen was unable to lead on the slants of the more clever twirlers. Miller's average to date is .301. Together with Olsen he leads the league in putting. Each has 19 runs to his credit.

He has asked for his release as he is anxious to return to Utah, but Manager White refuses to let him go until he has some ease of another twirl of the classic caliber. But sure has the smacks and all the tricks, but as yet he lacks control. Chandler, the Calgary third baseman, was in uniform to break his leg above the ankle in sliding to a base last season in an Edmonton game, arrived in town yesterday and will be seen in action with Regina tonight.

SOUTH AFRICAN SCRIP

Intending Homesteaders and Settlers: Stop and Look this Over Carefully

You have now the last opportunity of securing some of the finest land in the world at a reasonable figure.

There is only one other way of acquiring Government Land and that is by pre-emption. This costs you \$3.00 per acre and duties similar to those required by the homestead regulations and the same as those required under the South African Veteran Bounty Warrant Act, have to be fulfilled.

Why Not Buy Scrip in Preference?

Every settler should buy two scrip NOW and "prove up" on them and still retain his rights of homesteading and pre-empting. By doing so, he secures 640 acres of land as compared with only 320 acres secured by homesteading and pre-empting.

Do Not Forget that there is Lots of Land and Only a Limited Supply of Scrip

A great many persons are under the impression that scrip is good only till December 31st, 1910.

THIS IS NOT SO, AN EXTENSION OF TIME HAS BEEN GRANTED WHICH MAKES IT GOOD UNTIL DEC. 31, 1911

The total number of scrips available is now only some 2600 odd. And the present rate of consumption averages 70 per week. You can readily see that at this rate scrip will not last very long and as the supply decreases the price will naturally advance. This fact alone should prove to you that at the present price scrip is the best buying offered whether you use it yourself or not. **WRITE OR WIRE**

McNAMARA, YORK & McNAMARA
Wetaskiwin and Edmonton, Alta.

Johnson, will find difficulty in driving a home and carrying through, but Johnson says the contract is not binding. Johnson has peculiar ideas of contracts and arguments, anyhow. When the tariff attendants upon the election of a referee was at its height, he was reminded by the promoters that the articles of agreement called for the naming of a referee by the clubs in case the principals could not agree. The club won't name any referee for me," said Johnson. "But you signed articles to that effect," protested Rickard and Gibson. "Well, it was all right at that time but it is different now," remarked Johnson to the amusement of those who were harried in spirit over the deadlock. It almost seems as if Johnson considered an agreement null and void once the ink in which it is outlined becomes dry. Little may be able to get rid of the trouble but as a lander of the negro pugilist he has probably joined the Jack Johnson ex-managers association, of which Frank Corbett of Banfield and a few others are charter members.
